THE 2010 EMISORAS DE FM Created and published by Jim Thomas Announcing the 2010 Edition of Emisoras de FM

WHAT'S IN THE NEW EDITION?

What's in this book, that's different from the 2009 edition, that would be the reason you should have one? Obviously, every country & island listed has been updated to the most current information available. Accurate, authentic files from government licensing agencies have been used for every listing in this book. Secondary sources via the internet have been used to verify slogans and music formats for stations in the listings. A big bonus, especially for East coast dxers, is the comprehensive updates to Cuba & Haiti. This is the first edition that incorporates EVERY licensed fm radio station and relay station in Cuba and Haiti. And then, we have included Guatemala's list of 'un-licensed' religious broadcasters to the listings and maps. These are stations that signed on the air pre-1995, during the political unrest years. The Guatemalan government has allowed these to stay on the air, as they serve a very small area, as an ethnic, religious broadcaster. Continuing, several of the maps have been redesigned to make them easier to use. Because of the 'concept' of this book, the format has remained as a 'landscape' layout. This means the book may still feel large. Its even grown by a few pages from the previous edition. But, this particular format lends itself because of the amount of content that goes into the book. I also chose this format, recognizing the 'aging baby boomer population', desiring to keep the text large enough for those that don't like to squint. HOW MUCH IS THE LATEST EDITION?

The 2010 Emisoras de FM is an eBook(a 100 page PDF file). It can be downloaded from the WTFDA Discussion Boards located [HERE](#) for the purchase price of just \$10.00 USD. Once you have downloaded the book you will need a password in order to open it and read it. Please contact us for the password once you've paid your \$10. (Previous purchasers of this book can download it for free. Just ask for a password.)
