Good Enough to Use as a DX Tuner?

TV and FM DXing was never so much fun!

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH MCGINNIS AND MIKE BUGAJ.

Editor and publisher: Mike Bugaj
Treasurer: Keith McGinnis Webmaster: **Tim McVey**
wtfda.info Site Administrator: **Chris Cervantez**
Editorial Staff: Dave Williams, George W. Jensen, Jeff Kruszka
Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith,
Chris Kadlec, Peter Baskind and John Zondlo,
Our website: www.anarc.org/wtfda Our forums: www.wtfda.info

FEBRUARY 2007

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

<http://fmdx.usclargo.com/join.html>

Dues are \$25 if paid to our Paypal account. But of course you can always renew by check or money order for the usual price of just \$24. Either way, it's still a bargain!

VUDS ON A CD!

Every VUD from Jan 1980 to December 1989 is on this disk. You'll need Adobe Reader to read them. Why have a box of old VUDs taking up space when you can have this. **It's yours for just \$8.00 per disk.** Send your check or money order for \$8.00 to WTFDA, P.O. 501, Somersville, CT 06072. Make it payable to **WTFDA.**

And now... eVUDS ON CD!

All eVUDs from 09/01 through 12/05 are on this disc (except 8/02 which was not published).

Follow the changes from day one to the present form. **You can have it for just \$6.00** (\$5.00 plus a dollar shipping).

Use the same address as for VUDs on CD shown on the opposite column. Have a great month!

NEW!!! Emisoras de FM

BY JIM THOMAS

Everything you needed to know about FM radio South of the Border!

To order your copy of the 2006 WTFDA Mexican/ Central American FM Directory, send a check or money order for **\$16.50** payable to WTFDA and send it to Keith McGinnis, 6 Ritter Rd., Hingham, MA 02043. (For Paypal orders, send \$17.50 to mbugaj@snet.net. Use the comment box for any instructions.)

See much more at

MIKE BUGAJ MBUGAJ@SNET.NET

WARMTH OR COLD?

It was a warmer than normal winter in December and half of January for much of the east and south, while the Pacific Northwest, Southwest and much of the plains experienced the winter from hades. In those kinds of conditions you didn't find much in the way of DX. The winter Es season was mostly a bust. The only really good Es session occurred on the 8th of January. It covered a wide area from the East Coast to the south and midwest and went into FM in a few places. The southeastern states also enjoyed a little bit of tropo. Will the weather stay this way for the second half of winter? Probably not, but nobody really knows.

UH-OH!

Someone may be wondering what happened to the print quality in the January VUD. Yes, I noticed. Let's just say that the poor print quality was the result of a little experiment between myself and the guys at the printer. The intent was a VUD with better graphic and print quality. Well, we got the graphic quality right but the print quality went wrong. I think we'll put that project on the back burner for a while.

MEMBERS AND MORE!

We have one new member this month. We welcome Allan Radella to the WTFDA. Allan lives in Rochester, PA. We hope you enjoy being part of the WTFDA!

From the period of 12/10 to 1/12 we have renewals from **James Roggentine** (CA), **Steve Solomon** (MA), **Lenny Goldberg** (OR), **Dave Pomeroy** (KS), **Ed Norris** (IN), **Randy Davis** (IN), **Mark Casey** (MA), **Girard Westerberg** (KY), **Ted Liscewski** (NJ), **Craig Healy** (RI), **Russ Edmunds** (PA), **Bruce Hall** (ON), **John Ridge** (NY), **Tom Yingling** (MD), **Gary Olson** and **David Shapiro** (OK). Thanks for being part of WTFDA for another year!

Here's a note from our treasurer, **Keith McGinnis**: "I want to apologize to those members who have paid over the last few months but have not seen their checks deposited yet. My own fault due to new job, car hunting, house hunting and a number of family health issues (not me but others). Really no excuse but I still want to apologize.

They are all going in this week and we should be on track for the future."

Just for the records, I collect your dues at P.O. Box 501 and collect them. I log all incoming monies on an Excel spreadsheet and mail a copy of that sheet along with your checks and one of my checks (for Paypal users) to Keith around the 15th of the month. So I have a couple of checks that haven't come back also. Just bear in mind that neither one of us gets paid and that sometimes life has a nasty way of messing up our plans.

Tom Yingling sent in his dues and a QSL card. Here's his card. Send me yours and I'll put it here also.

From **John Ridge**: "The VUD is a pleasure to read every month. I can appreciate how much work is put into it. Only people truly dedicated to a hobby would volunteer their time to produce such an outstanding publication."

Hmm. Dedicated? Perhaps crazy is a better word. John goes on : "I'm in a coastal area very close to the water and over the course of a year the wind plays havoc with my antennas, particularly the larger ones. It sends me to the roof more often than I like. Smaller antennas last longer but have not produced good DX for me. Digital has wiped out a lot of old analog favorites and the RS digital tuner I have has not produced too many distant signals. Still, I continue my long time fascination for distant reception when I can find it."

I must admit that John's location peaked my curiosity, so one day I went to Google Earth and found John's house, which indeed is in a nice coastal area that looks more like suburbs than Brooklyn. When my wife and I were at Coney Island last spring we were only a couple of miles apart. Darn. But the Mermaid Parade WAS fun!

Here's a note from our newest WTFDAer, **Allan Radella**: "My interest in TV DX goes back to my childhood when I received a signal of a math class from TV Habana, Cuba and signals from 2 stations in Oklahoma which led to an interest in shortwave radio and anything about DX. I look forward to receiving your publication. I got the info from your website and I thank you for your time." Allan, thank you for joining! If you have any questions, just shout and we'll try to answer them. There's a lot of DX tenure in this club and there's at least one member out there who can answer most any question.

EBELING GOES DOWN UNDER

If you were wondering how we got that picture for this month's cover, we can thank **John Ebeling** for spending some of his retirement money on a trip for him and his wife to Australia and New Zealand. John writes "The picture is of the TV/FM towers in Adelaide, Australia. They are located SW of the main part of town on a Mt. Lofty, which is about 710 meters above sea level. The towers themselves are not very high. I'm sorry that I couldn't get a better picture, but being on a tour limits one's ability to do as one pleases."

That's a neat picture, and it really resembles the picture we had on the front of the VUD in June 2004 of the Albuquerque antenna farm. John also included some other goodies, and if I don't lose them, we could include them in a future VUD.

THE GOOD OLD DAYS

Bob Cooper received an email from an AIPA-era TV DXer. Perhaps one of you old timers remembers: "I have been a DXer (shortwave, AM, FM and especially TV) on and off since about 1950, although I have never broadcast, just listened and watched. I have been casting around the Internet for the past hour or so and was very interested to see that you were a member (publisher?) of the old AIPA at one time. I was a member when I lived in Buffalo between 1959 and 1964, when I put up my first decent TV antenna and logged about 300 stations over a 5-year period while attending the University of Buffalo (now SUNYAB). While there my best DX haul was XEFB-TV in Monterrey, MX, about 1,800 miles away (where I happened to visit last month - quite an impressive place). With a 75 foot tower and large Winegard antenna and booster I was able to pick up the Pittsburgh stations 200 miles away consistently (though faintly) late at night when my locals called it a night (remember "High Flight" and "The Lord's Prayer" so many stations used to sign off back then?).

A highlight of my very early TV-DXing was when, at 17 in 1957 while visiting my uncle

high up the mountainside in North Vancouver, I picked up KOIN-6 in Portland, about 300 miles away, using only "rabbit ears"! (Much later, early 80's, I lived in West Vancouver at the very top of "The British Properties" at 1,200 feet up, but even with a very large antenna I could never see KOIN again - they probably had to lower their power and/or change their directional antenna to protect CHEK in Victoria, which hadn't been on the air in 1957.

Subsequently I live in Poughkeepsie (NY) for 12 years or so, then Springfield, IL, a DXer's dream because there are hardly any stations less than 100 miles away! In 3 years I logged 300 stations, including my best UHF haul ever, WXTV-41 in NYC (Patterson, NJ), a Spanish-language station about 830 miles away. Memory is fading, but I believe it was in 1977 or 1978, when there was an unprecedented tropics opening from my place all the way to Florida, gradually extending northwards to New York by about 2:00 AM.

I now live in Los Angeles, where DX is virtually impossible, especially since I live in a swank neighborhood where neighbors would be aghast at a 100 foot tower, so I am not currently active."

(David Kanaar is the author of this email).

THE NBA ON TV

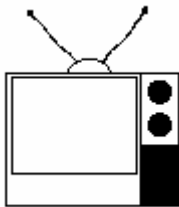

Ken Onyschuk sent in this list of NBA teams and the stations that carry their games:

Charlotte	MyTV	12
Chicago	WGN	9 Kerr/Larrinee
	WCIU	26
Cleveland	WUAB	43
Dallas	KTVT	11 Fallowill/Ortegal
Detroit	WDWB	20 Blagha/Laimbeer
Houston	??	51
LA Clippers	KTLA	5 Lawler/Smith
LA Lakers	KCAL	9 Meyers/Lantz
Memphis	WMC	5 Pranica/Tuohy
Milwaukee	WCGV	24
Orlando	WRBW	65 Goukar/Stewart
Philadelphia	WPSG	57 Zumhoff/Mix
Phoenix	KUTP	45 Leander
Portland	KGW	8 Barret/Rice
Sacramento	KXTV	10 Napier/Reynolds
Salt Lake City	KJZZ	14 Bolerjack/Boone
San Antonio	KENS	5
Washington DC	WBDC	50 Buckhantz/Chenie

The rest are on cable. This was sent to me by Dave Williams, who received it from Ken and I am not responsible for any typos.

That's it for this month. Don't worry folks, spring is just around the corner, and we're one month closer to analog shutdown. Take care!

Thanks to Chris Read, John Zeis, and Pat Dyer for information appearing elsewhere in this month's column.

K26IW in Texas is probably on channel 26, not channel 0!

The FCC has proposed digital channels for six stations whose permits were granted after the permanent allotment process began.

One station, on channel 46 in Derby (Wichita), Kansas, proposes to sign on as a DTV station and remain on channel 46 through transition. Four stations (channel 27 in Duluth, Minnesota; KRBK-49 in Osage Beach, Missouri; WWJX-51 in Jackson, Mississippi; and KOHD-51 in Bend,

Oregon) propose to flash-cut to digital on their existing analog channels. (KOHD actually did so before even signing on the air – they never operated as analog)

Channel 22 in Topeka, Kansas did request a separate channel for digital. The Commission proposes assigning DTV channel 12. There are existing analog stations in Topeka on channels 11 and 13 – the new station proposes to place its DTV antenna on channel 11's tower. (this is however quite some distance from channel 13's.)

The Commission has also released nearly 900 digital companion channel grants. They're now up to K13ZC – only 23 callsigns remaining for west-of-the-Mississippi LPTVs on channel 13. I am most curious what will happen when (if) the K13 calls run out...

John says WHYD-DT has moved to channel 50. I can find nothing on this in the FCC DB, and 50 is not WHYD's elected permanent DTV channel. (they're returning to channel 12 after transition) My guess is Qualcomm arranged for WHYD's move, in order to free up channel 55 in the Philadelphia market. The information John sent indicates the technical facilities (power, tower height, tower location) have not changed, only the channel.

Pat writes his local "Transguide" LPTV on channel 54 has moved to channel 53 and become K53JC. See the press release on <http://www.transguide.dot.state.tx.us/PublicInfo/lptv53.php> .

This station broadcasts the freeway cameras established in the San Antonio area by the Texas Department of Transportation. It also doesn't appear in the FCC database... Why they went to channel 53 – and not something below 52 – I have no idea.

The Mexican DTVs appeared on a list released by the Canadian CRTC after a proceeding discussing the future of DTV in Canada. The three Guadalajara stations with channels listed as ?? were shown with their analog channels. (or, probably, their "major channel numbers" for DTV)

The other two Mexican DTV stations known to exist - XHAW-DT 50 in Monterrey and XETV-DT 23 in Tijuana - were also on this list. And, the list indicated there are two

DTV stations in Guatemala: one on channel 17 relaying analog channel 3, and one on channel 19 relaying analog channel 7. Frequent skip target WSKY-4 (Manteo, N.C. in the Outer Banks) may have switched from analog to digital operation. Mark Casey K1MAP says he didn't see the station (on an analog TV) during a ten-day visit to the area in mid-December. Richard Lucas looked up the station on <http://www.wikipedia.org> and found "The station's analog signal is expected to sign-off prior to the end of 2006 when the Digital signal (also on 4) will sign-on from a new tower being constructed on the Virginia/North Carolina border. "

I'm not sure why KDTN-2's new facilities are only 40kw, instead of 100kw. It might have been explained by DTV – that since the new antenna is nearly 500 feet higher than the old, at 100kw the coverage area would have caused co-channel interference to a channel 2 DTV facility (or adjacent-channel interference to channel 3) that was built assuming KDTN's antenna would remain at 412 meters.

But I can't find any DTV stations on channels 2 or 3, either existing or in the final, permanent channel table, that are anywhere near close enough to Denton to be at risk of interference. Probably the closest permanent DTV facilities would be KNOP's on channel 2 (North Platte, Nebr.) and KDLO's on channel 3. (Florence, S.D.) The closest interim facilities would be KDLO's on channel 2 and WBBM (Chicago) on channel 3.

Maybe it's economic? KDTN's permanent DTV facility will be their current operation on channel 43. Their new channel 2 facilities will only last for two years.

My guess is they got kicked off (or didn't want to pay a rent increase on) their existing tower, found a tower with some space available, but it wouldn't hold an antenna large enough to achieve 100kw ERP with their existing transmitter. Rather than buy a new transmitter that would be only good for two years, they decided to settle for 40kw through transition.

I doubt most viewers (and DXers) will notice any difference.

Good DX!

LPTV Companion Channels

The FCC has granted the following LPTV/translator companion channels. The specified stations will be allowed to operate a separate low-powered digital facility until some future time, at which they will be required to surrender either the new digital channel listed below, or their existing analog channel.

Note that in a number of cases, the specified digital channel is already in use by a full-power analog station in the same city! (channel 42 in Mobile, Alabama, for example) I would presume such companion channels cannot be "lit up" until after the analogs are shut off. This leads me to believe LPTVs will be allowed to continue to operate in analog after full-power digitals are shut off. I have marked such "not until transition" channels in *italics*, though I don't promise such marking is complete.

6 METER/2 METER AMATEUR DX CONTINUES FROM PAGE 45

Using an identical radio and a dipole, my brother, WA4CB, managed nearly 100 countries during a contest weekend in 2002. Sure, this was not long after Cycle Maxima, but it still illustrates the usefulness of this cute little radio.

Loggings

Bill Smith, W1OW, 56 Locust Street, Douglas, MA 01516 FN42

December was not as good as last year – making it a pretty poor month.

7 Dec. '06

Very brief opening to the South. Worked KG4NLZ/EL99 @ 0132 UTC; W4RUN/EL98 @ 0140; KI4RSQ/EM80 @0145

11 Dec. '06

Very brief opening west. Worked AB0HF/EN32 @ 2110

15 Dec. '06 – 16 Dec. '06 (Aurora)

2327	VE3EN	FN25	0026	VA3NQ	FN13
2339	VA2SG	FN48	0031	VE3DXP	EN92
0024	W4TAA/VE3	FN15	0036	VO1NO/VE3	FN24

27 Dec. '06

Weak, watery opening to the south. EL88 and EL99 in.

WTFDA FM NEWS

Bringing you the most recent FM changes in the U.S. and Canada!

FEB 2007

After a whole eight hours constructing this month's column, I am happy to announce a great deal of format and slogan changes can be found here. This month also includes a huge amount of auxiliary station changes, shown at the bottom of the column. The information presented this month is current as of the end of January.

INDEX OF ABBREVIATIONS

AF applied for (a new station)
 AFA American Family Association
 Aux Auxiliary antenna (backup)
 CC call letter change
 CL city of license change
 CX a construction permit has been cancelled
 C1-C5 change in status to that FM license class
 DA directional antenna
 DE station has been deleted
 FC format change
 GA granted amendment to table of FM allocations
 GE granted extension of construction permit
 GX granted replacement of expired permit
 LC license to cover filed (ready to come on air)
 MC multiple-city ID
 NC no change yet on a reported change or permit
 ND non-directional antenna
 NO not on the air

NS new station granted
 NW new station signs on
 OSA one step application granted for change
 PA proposed amendment change to FM allocation table
 PC power change on the air (> = increase, < = decrease)
 PG power change granted (> = increase, < = decrease)
 PR power change requested
 QC frequency change occurred
 QG frequency change granted
 QR frequency change requested
 RA silent station returns to the air
 RE station requests an extension on permit
 ROA request of applicant
 RX station requests replacement of expired permit
 SC slogan change or update
 SI station is silent
 SOA signed on the air
 XA dismissed amendment to FM allocations
 XC transmitter site change occurred
 XG transmitter site change granted

CANADA

Alberta / AB

Calgary 92.9 CFEX-FM / CC for NS; FC to modern rock
Calgary 101.5 NEW / NS, hot adcon, 48kw/160m, 51-03-37/114-10-13. Previously granted but requested frequency 90.3 assigned to someone else. CKUA-FM-6 Red Deer moved from 101.3 to 107.7 to accommodate this.
Cochrane 95.3 NEW / AF 100w/-42m, to relay CFIT-FM Airdrie. Previously approved but required to seek new frequency.
Lethbridge 98.1 CKVN-FM / CC from CJTS-FM; QG from 97.1, 20kw/174m
Red Deer 107.7 CKUA-FM-6 / QG from 101.3
Slave Lake 92.7 CHSL-FM / CC from CKWA-FM; FC to classic rock

British Columbia / BC

Atlin 98.7 NEW / AF 48w/9m, // CKRW-AM Whitehorse
Campbell River 100.7 NEW / NS 540w-V/877m, 49-45-13/125-17-46, native
Campbell River 106.1 CFWB / QR from 1490 AM denied: new FM facility would not provide required 3mV/m signal across Campbell River. CFWB encouraged to file new application with amended technical parameters.
Kelowna 103.1 CKOV / QR from 630 AM, 35kw/114m, soft adcon
Powell River 105.3 CHQB / QR from 1280 AM, 3kw/408m
Sooke 97.1 CJZN-FM-1 / CC from CKXM-FM-1; FC to CJZN (91.3 modern rock)

Manitoba / MB

Fisher River 96.9 VF2503 / FC for NS; relays CINC-FM (NCI Aboriginal)
Paint Lake 93.3 VF2504 / FC for NS; relays CINC-FM (NCI Aboriginal)
Winnipeg 100.7 CHNK-FM / FC to traditional country; CC from CKFE-FM

Winnipeg 104.7 CJNU-FM NW 16w-V/114m, nostalgia. Temporary license; must take significant silent periods.

New Brunswick / NB

Moncton 106.1 CBA / QG from 1070 AM, 69.5kw-H/34.3kw-V/211m, 46-08-41/64-54-14 on the same tower as CBA-FM 95.5, CBAF-FM 88.5, and CBAL-FM 98.3.

Newfoundland and Labrador / NL

Grand Falls 103.5 NEW / NS 50w-V/-5m, 48-57-33/55-39-47, religious, to operate only 6-8 hours a week in Grand Falls/Windsor

Northwest Territories / NT

Inuvik 98.7 NEW / AF 44w/36m, // CKRW-AM Whitehorse

Nova Scotia / NS

Bedford 89.1 CHSB-FM / NS, religious, only 40 hours per week
Halifax 89.9 CHNS-FM / FC to classic rock for new station and reportedly using slogan "Hal FM" despite 105.1 CHAL
Halifax 98.5 CKRH-FM / NS (previously requested 89.7), French community

Nunavut / NU

Iqaluit 88.3 NEW / NS 800w/-37m, 63-44-20/68-33-25, CBC Radio 2 // CBM-FM Montréal

Ontario / ON

Brantford 92.1 CKPC-FM / PG>80kw
Brockville 99.9 NEW / NS 50w, to relay CKJJ-FM Belleville
Cobourg 100.9 NEW / NS 50w, to relay CKJJ-FM Belleville
Cobourg 107.9 CHUC-FM / PR>20kw/216m
Erin 101.5 CHES-FM / CC for NS

Geraldton	94.7 CHGS-FM / NS, for emergency information only
Kenora	100.5 CIKN-FM / FC for NS; relays CINC-FM (NCI Aboriginal)
Kingston	98.9 CKLC / QR from 1380 AM withdrawn
Ottawa	104.7 CIIO-FM / CC for NS
Ottawa	99.7 CIIO-FM / QR from 104.7 for new TIS, bounced by CJRC-1150 Gatineau's permit to move to 104.7
Pembroke	95.3 NEW / AF 2.57kw/91m, classic rock
Strathroy	105.7 NEW / QG from 91.1 due to objections from CJRT Toronto
Wasaga Bch.	97.7 CHGB-FM / CC for NS; FC to classic adcon

Prince Edward Island / PE

St. Edward	101.1 NEW / NS 1.91kw, CBC Radio 2 (or Radio 1? Decision says FM needed to fill gap formed when CBA-1070 moves to FM, but CBA is Radio 1)
------------	---

Québec / QC

Chibougamau	96.9 NEW / AF 37w, to relay CHEF-FM, denied for economic reasons; market can't support another station
Montréal	106.7 CKAV-FM-10 / CC for NS
Québec	92.7 CJSQ-FM / CC for NS; classical
Saguenay	99.9 NEW / AF 6kw/18m, French pop/rock in Saguenay (La Baie)
Salaberry-de-V.	106.5 NEW / AF denied for economic reasons - market can't support two stations (other is CKOD-FM)

Saskatchewan / SK

N. Battleford	102.9 CJNB / QR from 1050 AM denied. It would result in common ownership of three FM stations in a market with fewer than eight commercial stations.
Tisdale	103.1 NEW / AF 273w/30m, to relay CJNE-FM Nipawin
Tisdale	103.1 NEW / AF withdrawn for relayer of CJNE-FM Nipawin here
Weyburn	103.5 CKRC-FM / CC for NS

Yukon Territory / YK

Dawson City	104.9 NEW / AF, 413w-H/-94m, 64-03-29/139-24-49, CBC Radio 2 // CBU-FM Vancouver. It will use old CBDN-FM transmitter. (CBDN-FM is moving to 560 AM)

 Florence, NJ 08518
 E-mail: nick.langan@gmail.com

The Editor's Note

A couple E-Skip openings popped up to add to the more April or May-like weather conditions the East had been seeing in January, but now that the cold has seemed to finally hit, the DX has seemed to reflect the time of year. Have no fear, several reports to get to this month, let's get to it.

Nothing much tropo wise; pretty slow DX wise.

Dennis Park Smith

3605 San Remo Drive

Santa Barbara, CA 93105-2523

Telephone (805) 687-7803

This report is for November and December 2006. I did not keep detailed track of Southern California coastal tropo conditions this time to San Diego/Tijuana (up to 200mi/320km). Generally though, from **Oct. 26** eve through the first several days of November, there was no tropo, due to unsettled weather. Then, from approx. **Nov. 8** through **Nov. 23**, tropo was steady with stable weather though only sort of warm, so signals averaged poor (sometimes very poor and sometimes fair but mostly steady at poor). From **Nov. 24** through **December 15**, there was no tropo, with unsettled weather again (slight rain and then increasingly cold).

The remainder of December (it was interesting that there was any tropo at all this time of year):

December 16-26: Variably Poor
December 27-29 AM: None (a little rain 27 AM)
Dec 30 Eve: Fair (VHF Good)
Dec 31 AM: Poor
Dec 31 Eve: None

Best of DX to All, Dennis

2000 DX Gone

I may have missed out on some of the opening of 11/12, wasn't feeling well. That opening wasn't very widespread. The only really strong stations when I turned the set on were WBKI-34 and WPXK-54

A bit of Es and a little tropo were the highlights in December. Nothing to get excited about, though.

Some nice tropo this fall, though nothing terribly long-haul like in the old days. Have not been to Burnt River site much due to renovations there, so did not do much in the way of meteor scatter DX during the major fall showers. Things should return to normal early this spring.

Very slow here dx wise. I've lost about 26 frequencies to IBOC from locals and semi locals. Not much FM left. No Au, Ms or Es just a nice TR opening on 11/23. Spent time on TV.

Haven't heard from anyone about doing a filter mod for my JVC VT-900 tuner. I will pay for the jobs, part and shipping. Call or drop a line via snail mail as I don't have a computer here yet.

Happy New Year all.----Jim

Comments: The January 4 opening was a very nice surprise. They were many relogs to TN AL and MS. November 23 was another good day (Thanksgiving) and got four new stations. I tried for meteor scatter in December and early January and found nothing like in previous years. Where have the meteors gone? 73 - Ralph

PLAYING WITH A SANGEAN HDT-1 HD TUNER

Just How Good Is This Tuner?

Bill Nollman graciously allowed me to take his Sangean tuner home with me to try out for a while. I wanted to hear HD radio for myself, and I wanted to find out for myself if this tuner is as good as Bill, Keith McGinnis and Jeff Lehmann all say it is. After playing with and listening to this tuner for a few weeks, I definitely have thoughts on HD radio, HD audio quality and the selectivity of this radio with regard to FM DXing.

Let me tell you a few things about the Sangean. First, forget the letters HD and let's pretend it is just your average \$200 analog AM/FM stereo tuner.

The first thing I noticed about this tuner is its selectivity. Jeff sent me the tuner's spec sheet. Selectivity is not even mentioned. But after playing with the unit for some days, I can guess.

My old Carver TX-11 with stock filters runs a bit over 30db adjacent channel selectivity. This tuner runs rings around the stock Carver. I thought my Carver with a couple of 150khz filters was pretty good and the same goes for the Denon 1500 and the Onkyo T450 RDS tuner but this tuner is right up there with them. If I had to guess, the Sangean is around 50db adjacent channel selectivity., maybe more.

I spent lots of time listening to my few open channels. 107.5 is completely open with no splatter from my local WACC-LP on 107.7 in any direction. The same goes for 102.5. Ottawa and Rome. NY are clear and it's fun to listen to them come up out of the mud. And speaking of mud, this tuner sounds great at very low signal levels. I can compare this tuner to the modified Onkyo T450, which can bring signals out of the mush clearly.

Despite the narrow selectivity, this tuner sounds good, not muddy like some tuners get when loaded down with narrow filters.

This filter has RDS. I like the way the information is displayed on the front screen. RDS data pops up very fast. The tuner does not display PI codes, but what it does do is take the PI codes and turn them into call letters directly beneath the PS information. Most calls are correct but bogus PI codes from the Clear Channel stations show up as call letters beginning with K and there's nothing we can do about that.

One negative to this tuner is overload. Bill has major issues with overload at his home in Farmington, where he can almost reach out and touch the towers. I'm a little luckier. I had no overload issues aiming into WMAS 94.7, about 10 miles north of my home and also in a direct line to WHYN 93.1. But turning my antenna west toward WAQY 102.1 and WPKX 97.9 (15 miles across the valley) gave me some overload. I noticed it from 87.5 to 88.0 for some reason in more than one direction. My situation was not serious. The overload was weak.

I had more overload pointed toward West Peak south of Hartford and home to a variety of Hartford transmitters. 104.5 was a mix of two or three stations and a few parts of the dial including that below 88mhz had some overload where I would not have expected. But the overload is on the weak side and would go away if I move the antenna a few degrees away from the antenna farm.

I would like to buy one of these eventually. The sensitivity, selectivity, audio quality and RDS display make this tuner a keeper.

Maybe now it is time to mention HD. The first thing I did when I hooked up this tuner to my Marantz amplifier was to attach some bunny ears and hunt for HD. This tuner immediately locked on to 14 stations with HD (yes, sad, isn't it?). WAMC blinked the HD icon but wouldn't decode. WPLR 99.1 would not decode with rabbit ears because its IBOC sidebands were blocked on both 98.9 and 99.3.

With my APS-13 connected, both WAMC and WPLR shifted into HD mode plus WEBE 107.9 in Westport (the Sangean caught the 108.1 IBOC sideband since 107.7 has my local WACC there). WEZN 99.1 sometimes decoded. No Boston stations decoded, but WWBB 101.5 and WWLI 105.1 both did decode much of the time. The tuner picked up the WWBB IBOC on 101.7 while it picked up the 105.3 IBOC from WWLI. WSRS 96.1 Worcester also decoded 100% of the time. Worcester is around 50 miles, Providence a bit further away.

I was particularly surprised to see WAMK 105.1 in Gt. Barrington MA locking in with HD. I would have never suspected it. I have three stations that have permanently tossed 105.3 into the dead zone. One is WWLI 105.1 in Providence, the next is new local WVEI 105.5 in the Springfield area and the last is WAMK on 105.1 Each one of these stations needs 105.3 to be heard here in HD at this location. 105.3 has been nuked here permanently.

I said that the Sangean tuner has great audio quality. What about HD audio quality. Was the result worth the effort? From what I've heard...no.

I listened to all of my locals as they decoded from analog to digital. When a signal turns from analog to digital, most stations tend to become a bit louder. One or two give you the feeling that you've walked out of a closet into an auditorium. A couple become quieter when in HD mode. But with most, I could not tell any difference. I was expecting to be blown away by HD, I was disappointed.

What could make HD work is multicasting. WDRC 102.9 has oldies. WDRC-HD2 has *real* oldies, as in the 50s, with obscure songs I've never heard and Big D (and older) jingles. I put this on the speakers for 3 hours and my wife and I thought it was really great.

Another station, WWBB 105.1, has something called *Personality* on it HD-2 channel. I heard some 40s old time radio, a Daffy Duck song (featuring Daffy on vocals) and some other odd

stuff that made me listen up and take notice.

But for most of the rest, the HD-2 channels were just more of the same. I would not buy this tuner primarily for HD listening.

One question that bothered me was why Sangean built this set with such good selectivity. I've heard that other HD radios (table radios) are also good in the area of selectivity.

Receiving a station in HD depends on the radio being able to see at least one IBOC sideband. If the radio's selectivity was poor then the analog signal would spill all over the digital sidebands and render them completely useless.

But with selectivity as good as the Sangean's, the tuner has no problem "seeing" at least one sideband, and that's all it takes to decode into HD. In a way, it's ironic that a tuner that was developed to deliver HD could also be considered a good DX tuner. I cannot believe it has no ceramic filters.

Just a couple of words about HD in the AM band. WTIC 1080 broadcasts in HD. I brought a 2 foot tuneable box loop upstairs to the tuner, peaked it for 1080 and could NOT get WTIC to decode. Only when I attached an 80 foot longwire to the antenna terminals did WTIC finally display the HD icon, and by the way, the HD signal sounded just like the analog. WBZ stayed analog. WTIC is 50kw and probably 20-25 miles south of my locations. I would not be too concerned with HD becoming a hit on the AM band. Not in the least.

I would recommend the Sangean HDT-1 as a very good DX tuner. It has no meter, but unless you are using antenna phasing, you really don't need one. What it does have, in the way of analog specs, makes up for the lack of a meter. And the price is nice also. You may never listen to HD, but it's there just in case somebody someday puts something on their HD-2 channel you like. And that's assuming that HD radio is still around in two or three years. We'll see.

Happy New Year!

Welcome to 2007, the year the Sun should reach the absolute bottom of the Cycle, and hopefully, start a long rise back up. Throughout the latter portion of December, the Sun was pretty quiet. But, early in the month, our star was shooting off X-class flares to beat the band, as a rouge sunspot transited the surface.

Spot 930, just before
rotating off the Sun's
right side.

Spot 930 had only limited effects on VHF. There was some scattered Aurora (see the loggings of Bill Smith below), and some high-latitude Aurora-induced E_s, but, in southern locations, little happened. Here in Memphis, I did notice a brief F2 peak on 28 MHz (10 meter band), but that lasted just a few days. And, of course, it's a long way from 28 MHz to 50 MHz when we are talking about F2!

An Odd Winter E-Season.

Christmas and New Year's came and went with practically no sporadic-E here mid-continent. Traditionally, I expect to see a nice E_s peak the week between the holidays, but this year brought almost nothing. Only once or twice did I even hear the 28 MHz beacons I expect to hear before 6 meters pops open. During one of those times, I did notice some voices in the noise on 50.125, but little else. Yawn.

The band did finally open during the early evening of January 8. Here in Memphis, I found 10 meters starting to pop about 4:30 local, then quickly followed by 6 meters. And, it was quite an opening!

With the short time I had to work the opening, I was getting massive signals from the East Coast, and equally good, short-hop from the West. Oklahoma City, at a distance of under 440 miles, was S9+ *on the back of my beam*. Wow. I had to leave shortly thereafter, but had some fun playing 6 meter FM from the car, working short-haul E_s to Chicago, Ohio, West Virginia, and the like. FM is a fun change, and can sometimes be quite surprising, especially considering it can effectively be worked with just a 50-watt mobile and a $\frac{1}{4} \lambda$ whip.

Not far from here, F H Prentice, KC5KBV, in Southeastern Arkansas worked his share of the Magic Band during the opening, logging FM07, FN02,

EN43, FN21, EL96, EN74, FM03, FN28, FM08, FN30, EN82, FN01, EM78, EM96, EN91, and EL97. 'Not too shabby for an off-peak opening. A few lucky operators even bagged a 2m QSO, or two. I saw paths listed on the logger from North Florida to Southern Wisconsin, and Eastern Oklahoma to Coastal North Carolina.

I picked up a new toy in the last couple of weeks. A small group of VHF enthusiasts here in the Memphis area has started an opening alert net, of sorts on the 222 MHz band (1.25 meters). So, I finally broke down and bought a FM-only rig for the band, an Alinco 235T – *just about* the only thing going on the new radio market for the band today. We all tend to monitor our local 224.42(-) repeater and inform one another when VHF starts getting interesting. Since the band is so seldom used, we can monitor 24/7, and not hear other chatter. So, if you're in the area sometime and have a radio for 222 MHz, check on in – one of us will probably be listening. And, it's a great way to use a band that may get taken away if folks don't occasionally make some noise there.

Licensing Changes.

The ham community continues to debate what some call “the end of an era,” the FCC's final decision to fully eliminate Morse Code requirements for amateur licensure. This has been a long and contentious process, with many hams choosing sides and engaging in spirited debate. It appears, though, the process is nearly at an end with the changes just weeks away. Before the Rule to finally go into effect, thirty days must pass following publication in the *Federal Register*. That process should be complete at 12:01am local time, Friday, February 23, 2007.

While the focus of this column is the World above 50 MHz, I would be remiss in not encouraging license holders to try out their new bands. Technicians will now have access to voice on 10 meters for 200 kHz, from 28.300 to 28.500. 10 meters is a great band – one that those conversant with low-band VHF will learn quickly. Unfortunately, 10 meters is highly-dependant on the Solar Cycle for F2, and we are dead at the bottom now, but conditions will soon slowly start to improve. And, of course, sporadic-E, the mode we all know quite well, is often available on 10m when it may not be showing on higher bands.

Getting on 10m can be cheap and easy. Sure, you can rush out and spend many hundreds of dollars getting on the air, but it can also be done on the cheap. I have always been a fan of the now-discontinued Radio Shack HTX-10. This is an all-mode 25-watt radio available used for very little money. I bought one a few years back in near mint condition for just \$50. Match that up with a DC power source and a down-and-dirty dipole – which can be made for just a few dollars with parts from Home Depot – and you're on the air.

(6 Meter/2 Meter Amateur DX Continues on Page 19)

COLUMN DEFINITIONS:

Total = Total number of FM stations logged from DXer's location (All loggings should be received within 25 mile radius of this location to count.)
 Freq. changes count as a station, call letter changes DO NOT count. Also count a station only once regardless if logged by different propagation modes. 88-92 = All stations logged from 88.0 to 91.99 Mhz.
 LPFM=Total LPFM/Translators Es = Total number of stations logged via E-skip .MS = Total by meteo rscatter.
 Au = Total via Aurora. USA = Total number of states and the "+" = Washington, DC.
 CN = Number of Canadian provinces logged. MX = Number of Mexican states logged.FO = Number of foreign countries, but not Canada or Mexico.
 TPU (Total number of political units) = Sum of USA CN MX and FO. YB = The year you began DXing from this location.
 AS OF & UPDATE = Date of last update. (Next update to include a category for HD (IBOC) stations total logged) - Fred Nordquist

COLUMN DEFINITIONS: are as follows: Total = Total number of TV stations logged from DXers location.

(All loggings should be received within 25 mile radius of this location to count.)

Freq. changes count as a station, call letter changes DO NOT count.

Also count a station only once regardless if logged by different propagation modes.

UHF = All stations logged from CHANNELS 14 TO 83. LPTV=Low PowerTV/Translators logged. HDTV=High Definition TV stations logged

Es=Total number of stations logged by E-skip. MS=Total by meteor scatter. Au=Total via Aurora. logged.

USA=Total number of states and the "+" = Washington, DC. CN=Number of Canadian provinces .

MX=Number of Mexican states logged. PO=Number of foreign countries, but not Canada/Mexico.

TPU (Total number of political units)=Sum of USA CN MX and FO.

YB = The year you began DXing from this location.

The detail Statistics databases are located at <<http://web.infoave.net/~fmjordan/statistics.html>>

Other groundrules for computing log totals are included in VUD Issue 4/99 or at http://www.anarc.org/wtfda/records_standards.htm.

Note: Many of you need to get current and submit your latest Scoreboard stats.

Also submit any distance records, states stats and personal best statistics. 73 - Fred
